

# Template-Based Chord Recognition

AI in Music, Winter Term 2025/2026

08.01.2026

## **Tutorial**

Familiarise yourself with the chord detection algorithm explained on the Audiolabs Erlangen Website. Work through the tutorial and replicate their baseline results.

## **Exercise 1 [Extension to Seventh Chords, 5 points]**

Extend the algorithm to include Major, Minor and Dominant seventh chords. If you are not familiar with the concept, this Wikipedia article explains it nicely.

Use the `exercise_7ths.wav` file from Moodle to test your algorithm. To compare, the correct chord annotations for this file are: Cmaj7, Dm, Dm7, G7, Am, F, Dm7, G.
